

# TKF OVERHEAD CONVEYORS

TKF has been engineering, manufacturing and installing material handling equipment since 1947. Specialists in overhead conveyor systems, the automotive, appliance and tire industries, finishing systems, etc. have long trusted us to design and install critical systems to help them meet productivity goals. Our team of experienced engineers have designed (enclosed track conveyors), (I-Beam), X348, (3 Inch), X458, (4 inch), X678 (6 Inch), monorail systems, and power and free conveyors including (enclosed track) enclosed over 3, 3 over 3, 4 over 4, and 4 over 6.

These systems are offered in capacities ranging from 50 pounds (or less) to 6,000 pounds per carrier with carrier production rates up to 80 carriers per hour. Ask for our detailed component catalogue or a system engineer to evaluate your needs.
