

TKF - MANUFACTURERS OF CUSTOM CONVEYOR SYSTEMS

TKF offers a comprehensive range of material handling services from initial engineering concepts through finalized design, manufacture and installation. Over 75 years of experience enable us to analyze your material handling needs and recommend the most effective solutions. TKF services include the following:

Turnkey Installations

TKF has wide experience in supplying conveyors, special handling devices and state-of-the-art turnkey systems for:

- Full case handling/transport systems
- Automated testing carrousel
- Automated accumulating & transport systems
- Automated overhead monorail and power and free conveyors

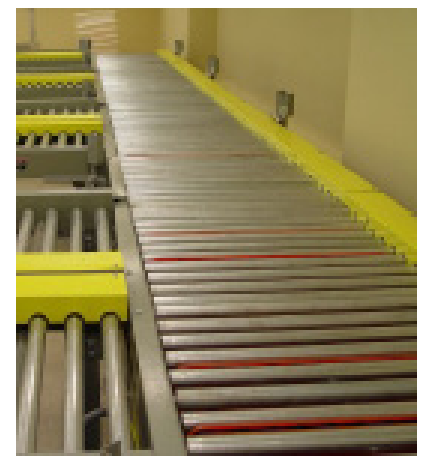

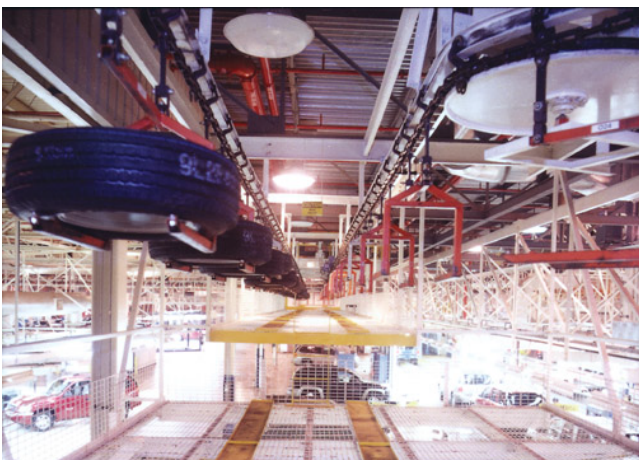

TKF systems are used throughout a variety of industries such as automotive assembly, appliance manufacturing, air compressor assembly, food/ pharmaceutical and many more.

TKF offers complete engineering services for all phases of systems design and project management. Utilizing 2D and 3D design to effectively solve any type of material handling problem.

Overhead Conveyor Systems

TKF Overhead Trolley Conveyors are available in a complete line of 3", 4" and 6" I-beam components, power and free as well as enclosed tracks. TKF designs and erects these components into complete systems for a broad range of industries. Catalog sent on request.

In addition to overhead chain, TKF offers custom-engineered Automated monorail in applications such as elevating, accumulating and switching. TKF provides turnkey services for everything from concept, design and engineering to fabrication, installation and debugging.

TKF - MANUFACTURERS OF CUSTOM CONVEYOR SYSTEMS

When your material handling system needs up-or-down movement, a vertical conveyor makes better use of the building cube than any other type of handling system. TKF specializes in vertical conveyors, offering all of their inherent space-saving advantages, plus a number of cost-saving benefits:

- Simple low maintenance design
- Selection of standardized units from modular components
- Fully automatic operation with the choice of continuous and reciprocating system types

Request a customer list and ask any of our customers about TKF service quality; or call us for examples of installations similar to yours, along with specific recommendations for your applications

Coveyors Offered by TKF

- Accumulating
- Assembly Line
- Belt
- Chain
- Continuous Vertical
- Drag Line
- Flight
- Floot-to-Floor
- Gravity
- Live Roller
- Oven
- Overhead
- Pallet
- Reciprocating Lifts
- Rollovers
- Slat
- Transfer, Right Angle
- Turntable/Tilt Table
- Upenders
